Прочитай формулы

$$S = V \cdot t$$
$$V = S : t$$
$$t = S : V$$
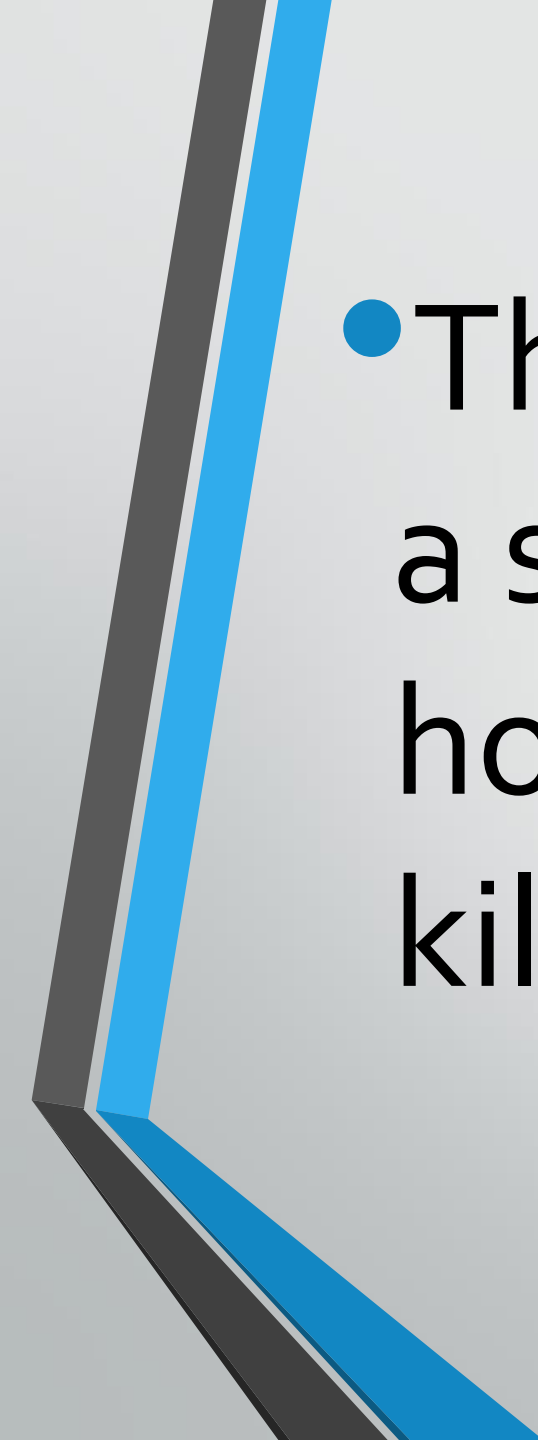

MAP OF THE WORLD

- The distance from Moscow to London is 2500 kilometers. The time of flying is 4 hours. What is the speed?

The average speed is 625 kilometers per hour

- That's why the plane leaves at a speed of 840 kilometers per hour. The height is about 11 kilometers.

- Fill in the time of flight, the time of arrival to London. The difference of time is 3 hours, e.g. It's 3 o'clock in Moscow now, but it's 12 o'clock in London. Answer the question: What flight will you choose and why?

- You go by car at a speed of 100 kilometers per hour. Your distance is 2900 kilometers. How long will you go?

29 hours

How much petrol do you need? There are 10 litres of petrol for 100 kilometres.

290 litres

The price of 1 litre of petrol is 44 roubles. What is the price? How much money do you need?

12760 roubles
